BEENA FIRE
ENGINEERING PVT. LTD.

AN ISO 9001: 2015 CERTIFIED COMPANY

About Us

“WE DON’T MANAGE, WE ENSURE SAFETY”

Beenafire Engineering Pvt Ltd is an innovation company dedicated and specialized in providing company solutions to all fire safety related issues. We are engaged in Training, Product support and designing activities. We have a history of delivering valuable services and support to the customers through engineering expertise, efficient operations and Quality systems. We have demonstrated our ability to handle projects successfully in the domain of Manufacturing and other sectors. Flexibility to adapt to varying needs of the customers coupled with the extensive knowledge of the industry has ensured delivery consistently.

Over the years, Beenafire has provided its Clients products which are Import Substitutes as well as customized products developed indigenously. The products have been certified for quality, functionality and acceptability by the Regulatory Authorities of the Indian Government.

We believe in investing in its infrastructure and newer technologies from time to time.

FROM CMD'S DESK

We strive to achieve new milestones in the industry and understand customers' needs. We make sure we provide the customers with the correct solution by giving them highest quality, state of the art products and services- before and after sales thereby helping the nation becoming safe from Fire hazards.

Mission & Vision

“We Offer the Best Service in the Market”.

We commit to prevent and suppress destructive fires, investigate its causes; Enforce Fire Code and other related laws; respond to man-made and natural disasters and other emergencies. Growing engineering organization dedicated to excellence through quality, creating value for customers, employees through innovation technology and operational expertise. We are technology driven company at our core with an overriding commitment to quality and our primary measures of success are customers' satisfaction and shareholders value. It is our strategic vision to conduct business with highest standard of ethics as we always believe “Honesty and Integrity”.

Customer satisfaction is the highest priority. The company will make every effort to deliver the highest quality products and services in business. The company will develop new strategies and plans based on customer driven philosophy for gaining competitive advantage, needed to meet the business objectives. Customers and employees input will be actively sought and strategically used for continuous improvement of quality and to fulfill ongoing customer needs. Strive to deal with our customers in an open and transparent manner. Continual improvement of “Processes, products, services and people” will be the norm in our business.

Our Services

Range of Best quality fire services which we offer.

Fire Risk Assessment

Whether you have an existing fire risk assessment in place or not. We can help it is essential that you keep the assessment under the review and revise it whether necessary. To ensure this, the following aspects are highly taken into consideration during auditing.

- Fire hazard identification
- Fire risk assessment
- Firefighting system
- Fire detection and alarm system
- Sprinkler system
- Internal and external fire hydrant system
- Gas suppression system
- Fire pump house
- Fixed fire suppression system
- Fire Extinguisher.
- Passive fire protection.
- Emergency management and life safety system

Fire Extinguisher (Refill & Service)

We offer services of Refilling of Fire Extinguishers to our client. Our professionals refill these extinguishers using fine quality chemicals and advanced machinery as per industry laid quality Standards. Offered fire extinguishers are widely demanded by our clients for their compositional accuracy, performance and cost effectiveness.

- Carbon Dioxide Fire Extinguisher.
- Mini Extinguisher.
- Dry Chemical Powder Extinguisher.
- Mechanical Foam Fire Extinguisher.
- ABC Dry Powder Fire Extinguisher.
- Clean Agent Type Fire Extinguisher.

Fire Safety Training

Fire safety training can teach workers how to recognize fire hazards, conduct a fire safety risk assessment, prevent a workplace fire, and respond if a fire occurs. The fire safety risk assessment helps identify what a workplace needs to do to prevent a fire and keep people safe. The assessment looks at:

- Emergency routes and exit.
- Fire detection and warning system.
- Firefighting equipment's.
- Removal or safe storage of dangerous substances.
- The emergency fire evacuation plan.
- The needs of vulnerable people.
- Communication with employees and others on the premises.
- Staff fire safety training.

Fire Safety Equipments & AMC

Maintenance Activities (Refilling and Servicing) of Clean Agent Systems (HFC 227 ea (FM200) /Novec 1230 /Inergen (IG01/IG55/IG541/IG100): Hydrostatic testing/valve Servicing/Refilling of all the Brand of clean agent Cylinders in India i.e. Kidde Fenwal/Ansul/LPG/ Chemetron /Fike/Fire Trace etc as we have customised supports for spares for all the Clean Agent brands spare parts sold across INDIA.

Annual Maintenance Contract (AMC) for firefighting equipment's. Fire Extinguisher AMC in Mumbai and all over India. There are many different types of fire safety equipment. Each device is designed specifically to deal with the different classes of fire in a range of environments.

Fire Alarm System Repairs & Services.

Fire Alarm Repairing Service to the clients. Fire Alarm Repairing Service is implemented by highly trained professionals using advanced equipment to meet the clients' needs. This service is acknowledged assured for high flexibility and quality. We also bound implement this service in a time manner. Offered service is very much important and is helps to provide sety and security to the building infrastructure.

Aspiration Smoke Detection System.

- Very early warning aspiration smoke detection system UL, ULC, ULR, FM, LPCB, Vds, CFE, EN54-2-, CE Approved Aspiration Smoke detection System immune to dust and nuisance alarms.
- Wide sensitivity, 4 configurable Alarms levels, cross zoning and modular design are some of the features of this products.
- Vesdanet and Auto learn are patented technologies of our panels.
- Alarm Sensitivity range of 0.005% - 20% Obscuration Airflow supervisor per sampling pipe and upto seven programming says.
- Can connect to multiple panels to BMS through Vesdanet interface for monitoring and supervision.
- Solution available for small rack based applications to full size server rooms/data centers.

Our Speciality

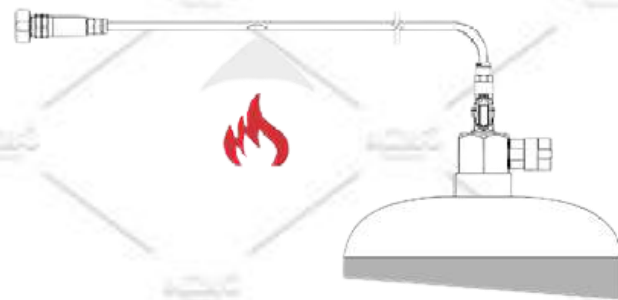

Fire Suspension System services.

BEENA FIRE Linear Heat Detection cum Fire Suppression Systems are manufactured in two versions:

- Direct Low Pressure System.
- Indirect Low Pressure System

Use of each version is determined by the type and size of the enclosure.

This system is referred to as direct, which means that the activation and distribution of the clean agent (HFC227ea, HFC236fa & FK-5-1-12) is secured by the detection tube. The fire suppression system operates by detecting fire and applying the agent using a detection tube connected to the cylinder valve. The detection tube is placed in the protected enclosure and is under constant pressure. In case of fire the detection tube degrades by the effect of fire or high temperature. When the detection tube is disrupted, the agent is released through the created hole. The detection system is independent of any electrical supply and operates solely on physical principles. The direct system is suitable for smaller applications and combines easy installation with simple operation.

BEENAFIRE AUTOMATIC CO2 TUBING SYSTEM (FACTS)

We are pleased to introduce BeenaFire Automatic Co2 Tubing System (BFACTS). An innovative automatic fire suppression system designed to provide a fast and reliable solution to extinguish panel & cabinet fires and help protect electrical panels. With the modern dependency on systems required being live, any interruptions in operations can involve huge financial costs and impact businesses severely. Therefore it is essential that special attention is paid to effective fire protection for these electrical installations ensuring you can achieve ideal protection for your equipment.

The Beenafire Automatic Co2 Tubing System (BFACTS) system provides ideal protection ensuring the fire will be extinguished in the first critical moments of their occurrence and works fully independently. The system is

Connected to a monitoring panel which provides necessary indication upon operation of the system and can be connected with the existing BMS / SCADA panels to ensure proper monitoring of the system.

Early Fire
Detection

Automatic
Operation

Easy to Install
& Maintain

Instant Fire
Suppression

Cost Effective
Solution

Can be
Connected to
BMS / SCADA

BIS & PESO/
CCOE Approved
Cylinders

Highly
Dependable

The system uses Carbon-di-oxide (Co₂) to provide quick and reliable suppression to combat the fire and suppress it before it can spread within the cabinets minimizing potential fire damage. The system is manufactured in two versions when used with Co₂:

- BeenaFire Direct High Pressure System (FDHP)
- BeenaFire Indirect High Pressure System (FIHP)

Use of each version is determined by the type and size of the enclosure.

We offer a variety of fire suppression fire systems designed to keep your building safe at all the times.

- Restaurants fire suppression systems.
- Vehicles and commercial fleet fire suppression system.
- Industrial fire suppression system..
- Auto body and paint booth fire suppression system.
- Microenvironment fire suppression system.
- Hazardous material storage fire suppression system.

Our Products

All Types of Fire Extinguishers

Smoke Alarms

Fire Hydrants

Manual Call Point

Fire Alarm System

Fire Sprinklers

PPE Products.

Fire Signage.

SCAB Sets

Hose Box

Fire Blankets.

All types of Valves

Hose Reel Drum

All Types of Nozzles.

Fire Ball

Spill Kit.
