Clean Agent Systems

- Clean Agent Fire Suppression Systems -Waterless Solution for Expensive and Corporate Assets Clean Agent systems provide protection for facilities containing valuable corporate assets from people and processes to equipment and software.

- Active on Fire. Safe for People. Clean Agent systems like FM-200, Novec 1230 Inergen IG 01/IG55/IG541/IG100 provide protection for facilities containing valuable corporate assets from people and processes to equipment and software. They combine the benefits of clean agent rapid fire extinguishing properties and discharge as a gas, reaching into all areas of the protected facility in terms of Volume and leaving no residue unlike Fire Sprinklers and other fire protection systems to damage sensitive equipment or require costly cleanup. This enables you to get back to normal business operations faster after a fire.

Environmentally-Friendly. Clean Agents are the most versatile and tested clean agents on the market, has zero Ozone Depletion Potential (ODP), a low (or no)

Fire Safety Signs

- Fire safety signs are used to provide health and safety information, either to warn you of a hazard, to provide an instruction or to give you safety information. Safety signs can be a variety of colours – usually red, green, yellow or blue – and may contain images, words or a mixture of the two. It's essential that you adhere to the fire safety signs in your workplace and any other public space: they are there for your safety and ignoring them could have serious consequences.
